

Acknowledgements, Funding, COI & Ethics:

This study was funded by a grant from the "Deutsch Arthrose-Hilfe e.V." (<http://www.arthrose.de/>). The funders had no role in study design, data collection and analysis, decision to publish, or preparation of the manuscript.

The authors have declared that no competing interests exist.

The study was approved by the local institutional review board (University of Bonn Ethics Committee; 14.10.2009, No 046/09). All patients signed informed consent prior to being enrolled in the study, and the study was conducted in accordance with the declaration of Helsinki.
