#### **SPECIFIC COMMENTS TO AUTHORS**

This is a very interesting manuscript about a field not always good understood. My suggestions are: In the paragraph (High or Low Migration Treshold?) It would be usefull that author give a RANGE on threshold migration parameters based upon the diferent references. In the same paragraph A curiosity of this reviewer: on 2015 it was been possible to elucidate by CT'scan a migration less than 0.15 mm?

#### **SPECIFIC COMMENTS TO AUTHORS**

The article is interesting. However, in the opinion of the reviewer, autobiographical digressions are unnecessary (THE COOLFIX CEMENT section, paragraph 2).
