

**Reviewer 1:** The review provides information on third and fourth generation quinolones for treatment of H. pylori infection. The review also concludes sitafloxacin-amoxicillin-vonoprazan the best triple therapy for treatment of H. pylori infection. The information on quinolones can be used for development of next generation drugs for treatment of H. pylori infection

**Answers to reviewer:** Thank you very much for careful review.

**Reviewer 2:** In my opinion a great article. Very relevant problem and excellent analysis. Must publish. I draw the attention of the authors to Figure 1 (Map. In Russia, China is written. Fix please).

**Answers to reviewer:** Thank you very much and we revised Figure 1 correctly.

**Reviewer 3:** Dear authors You did a great job, the topic is interesting, the collective tables are innovative. Minor comments are included in the revised manuscript, made by the track changes of Microsoft Word.

**Answers to reviewer:** We thank the editors and reviewers for their careful review and valuable comments. We have revised our manuscript based on these comments.
