Endobronchial tumor in children: unusual finding in recurrent pneumonia, report of three cases

Silvia Madafferi, Vincenzo D Catania, Antonella Accinni, Renata Boldrini, Alessandro Inserra

Abstract

We are reporting 3 cases of pediatric endobronchial tumors presented with recurrent pneumonia. The median age of patients, at time of presentation, was 10.6 years. All patients presented with recurrent pneumonia with a mean time to occurrence, after onset of symptoms, of 14 months. Bronchoscopy was early performed as part of
