COMMENTS TO AUTHORS

This paper bring us a very important information about the inflammatory microenvironment and expression of chemokines in hepatocellular carcinoma. This study found that inflammation microenvironment and differential expression of chemokines, particularly CXCL1, plays critical roles in tumor growth. The result is very important for advanced reserach. However, English usage is at times a little unusual and would benefit from careful review.

COMMENTS TO AUTHORS

Interesting analysis in a hot topic such as cytokines and its relationship with HCC and potential therapeutic target. The grammar and use of english need some work, introduction is not clear, discussion is very interesting but slightly unappealing. I suggest the revision by a native english speaker.
