		<input type="checkbox"/> No records	<input type="checkbox"/> Major revision

COMMENTS

COMMENTS TO AUTHORS:

The study is generally good and gives good review about splenic metastasis from gastric carcinoma. The major criticism is in the list of references you used. In table 1 you referred to references from 1 to 10 as a reference number 8 (different authors) and these 10 references are not present in your reference list. again in your table 1, reference 12 and 13, you refer to them as reference number 4. You should use the following reference to complete your review: Pure hepatoid adenocarcinoma of the stomach with spleen and lymph-node metastases. Lu CC, De-Chuan C, Lee HS, Chu HC. Am J Surg. 2010 Apr;199(4):e42-4.
