SPECIFIC COMMENTS TO AUTHORS

This is a good review. But, I found some confusions in the paper. Firstly, some Figure should be add some indicators, such Hyaline globules, multinodular HCC in grossing, and vascular invasion, because the journal faces to some clinicians. "Para. 2 in Pathology of Precancerous lesions and Conventional HCC " undifferentiated type is not a grade of HCC in 2019 WHO, so it should be revised. "Para. 1 in Macrotrabecular massive (MTM-HCC)" the definition of MTM-HCC should be more than 9 cells thick in 2019 WHO.

SPECIFIC COMMENTS TO AUTHORS

Comments for ESPS Manuscript NO 61843 This Minireview is interesting. And the authors should add necessary figures to simplify the complexity of the text, so that the readers have a more intuitive understanding of the content of this paper.
