

February 22, 2015

Dear Editor,

Please find enclosed the edited manuscript in Word format.

Title: Deafblindness and dual sensory loss research: Current status and future directions.

Author: Jesper Dammeyer

Name of Journal: *World Journal of Otorhinolaryngology*

ESPS Manuscript NO: 16098

The manuscript has been improved according to the suggestions of the reviewers:

1 Format has been updated

2 Revision has been made according to the suggestions of the reviewer

(a) "Pregnant formulations" from the summary has been moved to the abstract and core tip section.

(b) A section on aetiologies of deafblindness has been added in the beginning. It is also clarified that congenital refer to pre-lingual and acquired to post-lingual deafblindness.

(c) Agree the equation could be $1+1 = 22$ or 32 , but I find $1+1=3$ will be easier for the reader to understand. I prefer to keep it.

(d) Definitions of CHARGE and Usher syndrome are now included. The prevalence of Usher and CHARGE are now also given.

(e) All spelling and grammatical errors pointed to are corrected. Another proof read of the manuscript has been carried out.

3 References and typesetting were corrected

Thank you again for publishing my manuscript in the *World Journal of Otorhinolaryngology*.

Sincerely yours,
