**SPECIFIC COMMENTS TO AUTHORS**

Good review. Please add some details for different types available, any information on the average cost per use, ideal candidate to use this technology; such as age, level of injury, BMI, male/female difference. Can you add some illustrations or figures to show how they are fitted and how they work.

### SPECIFIC COMMENTS TO AUTHORS

The paper : Robotic Exoskeletons: The Current Pros and Cons presents a well written comprehensive review I m not sure if the paper can be published as a letter to the editor rather than a review , because it included a lot of personal opinions rather than scientific research. The authors need to put figures of different types of exoskeletons
