COMMENTS TO AUTHORS

1. The authors alternate between the use of the term 'endoscopy' and 'colonoscopy' when referring to an endoscopic exam of the colon. I think the more accurate term is colonoscopy. 2. The manuscript would be strengthened by adding images of the colonoscopy (appendiceal orifice) and histology of the appendix (including appendicolith and evidence of appendicitis). 3. Some of the references are incompletely listed epub without volume or page numbers.

COMMENTS TO AUTHORS

This is a nice manuscript on an interesting topic. The manuscript would be substantially improved if it were published as a systematic review. The authors only need to undertake a literature search of MEDLINE, EMBASE, PUBMED etc... to search for all reports on this topic. A methods section should be included in the manuscript following the PRISMA guidelines for systematic reviews. Any additional studies could be added to the table and included in the discussion.
