		<input checked="" type="checkbox"/> No	

COMMENTS TO AUTHORS

A list of abbreviations would be helpful. Please check the manuscript once more in order to eliminate some minor linguistic/grammatical problems (e.g., line 178: "While this lead to a multicenter Phase I study of a liposome-based miR-34 mimic for patients with advanced HCC (ClinicalTrials.gov identifier: NCT0182997), this trial was withdrawn for immune-related serious adverse events" -> While this led to; line 465: "While these data do not necessary explain the downstream mechanistic effects of these expression differences" -> do not necessarily explain) and typing errors (e.g., line 177: "hepatoceullar carcinoma"). Table 1: "chromosal instability" -> chromosomal instability (?).

COMMENTS TO AUTHORS

This is a very good overview of what is known about the genetics of NETs of the pancreas. Will be useful for the readership of the journal.
