entity (age, sex, site, provisional diagnosis, treatment plan and follow up data). In discussion, it is advisable to include text related to the etiopathogenesis of this lesion. In case report, the duration of the lesion is mentioned as 5 days. Please clarify the duration. Additionally, the history on the initiating factor for the swelling, the growth of the swelling and aggravating and relieving factors needs to be mentioned. In case report, the authors mentioned that the patient was advised radiotherapy. Can the authors highlight the rationale behind this; since the lesion is a benign growth
