10 Posterior Ankle Impingement Syndrome (PAIS) is a common injury in athletes
11 engaging in repetitive plantarflexion, particularly ballet dancers and soccer players.
12 Despite the increase in popularity of the posterior two-portal hindfoot approach,
13 concerns with the technique remain, including: the technical difficulty, relatively steep
14 learning curve, and difficulty performing simultaneous anterior ankle arthroscopy. The
15 purpose of the current literature review is to provide comprehensive knowledge about
16 PAIS, and to describe a systematic four-stage approach of the posterior two-portal
17 arthroscopy. The etiology, clinical presentation, diagnostic strategies are first
