### COMMENTS TO AUTHORS

Dear authors, This case is very rare and an interesting case. With some revision, I recommend this article to be published. 1. In introduction, please write the full term of TTR. In the first expression, you'd better avoid the use of abbreviations. 2. In page 9, the contents of the line 10-13 and line 14-17 is overlapped. 3. In page 10, please revise 2,55±1,43 into 2.55±1.43(comma → point) 4. Please revise this manuscript with English native speakers. It has many grammatically incorrect expressions and repetitive words.

### COMMENTS TO AUTHORS

However the ocular manifestations of Familial Amyloidotic Polyneuropathy are very rare, this manuscript is an useful contribution for both transplantology and ophthalmology. I would like to kindly add that currently we have many different types of micro-invasive glaucoma surgeries (MIGS) and we may performe them instead of Ahmed valve surgery, which is very traumatic to the eye. I commend this manuscript for fast publication.
