Mesenchymal stromal cell-based therapy: Regulatory and translational aspects in gastroenterology

Dothel G *et al.* Mesenchymal stromal cells and intestinal diseases

Giovanni Dothel, Emanuel Raschi, Roberto Rimondini, Fabrizio De Ponti

Abstract

The past decade has witnessed an outstanding scientific production focused towards the possible clinical applications of mesenchymal stromal cells (MSC) in autoimmune and chronic inflammatory diseases. This raised the need of novel standards to adequately address quality, efficacy and safety issues of this advanced therapy. The
