

## ANSWERING REVIEWERS

November 13, 2014

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 14283-review.doc).

**Title:** Highlights in pathogenesis of vitiligo

**Author:** Ghada Farouk Mohammed, Amal Hussein Gomaa, Mohammed Saleh Al-Dhubaibi

**Name of Journal:** *World Journal of Clinical Cases*

**ESPS Manuscript NO:** 14283

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 Revision has been made according to the suggestions of the reviewer

(1) Interesting and relatively well written review. The diagrams are also nice. Not sure why there is a method/ objective section for what is essentially a review article. If a meta-analysis was the idea the methodology needed to be more detailed and rigorous. A brief mention of the clinical implications for each of these theories in terms of therapy of vitiligo might be a good addition The clinical image probably does not have much relevance.

3 References and typesetting were corrected

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,

*Ghada F Mohammed*
