COMMENTS TO AUTHORS

Thank you very much for your study. It is interesting to see how you could 'recycle' EGG. Your work is very impressive; however, I would not emphasize on the recycling process, but I would concentrate on inventory, development and research process.

COMMENTS TO AUTHORS

ECG is so limited in diagnosing for its lack of clinical utility. The innovative method for EGG recording introduced in this paper, which leave the gastrointestinal system in a natural way, is non-invasive, reliable and long-hour ambulatory for gastric motility monitoring. It would become a promising clinical tool for diagnosing gastric motility disorder
