COMMENTS TO AUTHORS

Very good manuscript, only some minor language polishing should be corrected.

COMMENTS TO AUTHORS

Title: Esophageal variceal pressure influence on the effect of ligation This manuscript about esophageal variceal pressure influence is vert interesting. In this manuscript, the authors explored the effect of in vitro porcine esophageal variceal pressure on complete ligation degree for polycyclic ligator. Three groups were studied. The results are interesting. Based on the results, the authors concluded that variceal pressure is higher, the effect ligation is worse. 1 Some red color words in the text, what's meaning? Please check it. 2 The text need editing. 3 The references list should be checked, and updated.
