COMMENTS TO AUTHORS

This is an interesting and well composed manuscript. It has been written in an unbiased style and is comprehensive for the subject matter. I have no reservations in recommending publication. If I had one suggestion to the authors that would be to include 1 or more Figures to break up the extensive text. Perhaps include a final flow-diagram of suggested treatment with Everolimus, patient management, and with associated possible side-effects.

COMMENTS TO AUTHORS

Page 3: Authors might consider including a figure indicating the EVR molecular mechanism of action. Page 4: Please add what the acronym eGFR stands for: estimated Glomerular Filtration Rate Page 11: Please add what the acronym CKD stands for: chronic kidney disease Page 19: Please add the word be in the sentence: "There was no clear definition of infection and the disparity could possibly "be" due to different definition among various studies."
