## COMMENTS TO AUTHORS

This is a worth publishing article but needs to be re written in a concise way. In the current form its is very monotonous and difficult to follow as there is data everywhere.

I have enclosed some suggestions:

What is your hypothesis? Goal of your study?

Cemented vs cementless stems

Age difference?

In my opinion, just start with method and material. No need to review the history as this is not a book chapter or review article.

Comparison of other registries should be tabulated and discussed in the 'discussion section'

Pl state the methodology used in your study

Please focus on the summary rather than history again
