ESPS Peer-review Report

Name of Journal: World Journal of Gastroenterology

ESPS Manuscript NO: 10826

Title: Profiling Cellular Bioenergetics, Glutathione Levels and Caspase Activities in Stomach Biopsies

Reviewer code: 02438889

Science editor: Yuan Qi

Date sent for review: 2014-04-21 19:36

Date reviewed: 2014-05-01 18:38

		<input type="checkbox"/> No records	

COMMENTS TO AUTHORS

Please shorten the method section. Add ...biopsies of patients to the title. Under the "gastric biopsies" heading you should mention that you base the biomarker content on tissue wet weight in mg. How much biopsy material in mg did you obtain per patient? Include a table about the clinical GI-diagnoses of the patients. In the conclusion of the abstract cancel the first sentence and add: "The corpus mucosa was metabolically more active than the tissue in the antrum". Use "pathophysiology" instead of "pathobiology".

COMMENTS TO AUTHORS

Interesting study. Its major limitation is the inclusion of patients with either normal or minor gastric pathology. This has to be mentioned and stated at the discussion, as well as the clinical impact of these measurements need to be further explored in future studies with patients with major gastric pathology.
