Review of the initial treatment and avoidance of scald injuries

Ryan T Bourdon, Brittany B Nelson-Cheeseman, John P Abraham

Abstract

Scald injuries, which describe burns to living tissue from hot liquids, are a very common injury that occur across geographical, social, economic, and national boundaries. Despite their ubiquitous nature, a complete understanding of the conditions which are required to cause scald burns is not yet available. In addition, clear guidance to medical practitioners is available through various guidelines however
