Manuscript Type: CASE REPORT

Distal gastric tube resection with vascular preservation for gastric tube cancer: A case report and review of literature

Masahiro Yura, Kazuo Koyanagi, Kiyohiko Adachi, Asuka Hara, Keita Hayashi, Yuki Tajima, Yasushi Kaneko, Hiroto Fujisaki, Akira Hirata, Kiminori Takano, Kumiko Hongo, Kikuo Yo, Kimiyasu Yoneyama, Reiko Dehari, Motohito Nakagawa

Abstract

BACKGROUND

Survival rates in patients with esophageal cancer undergoing esophagectomy have improved, but the prevalence of gastric tube cancer (GTC) has also increased. Total resection of the gastric tube with lymph node dissection is considered a radical

Resection of distal gastric tube cancer with sentinel node ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4316610>

Jan 28, 2015 · Background. **Gastric tube** cancers (GTCs) are **gastric** cancers that arise in reconstructed **gastric tubes** (GTs). Their frequency has increased with advances in surgical techniques and improvement of survival rates in esophageal **cancer** patients, occurring in around 1.7 to 8.6% of patients [1,2]. Previously, most cases of GTCs presented at an advanced stage, ...

Jan 28, 2015 · **Resection of the distal gastric tube** was safely performed with a Roux-en-Y reconstruction, preserving the right gastroepiploic artery and vein and the perfusion of the proximal **gastric tube**. We suggest **distal resection** of the **gastric tube** with sentinel node biopsy as a novel surgical method for a cT1N0 **gastric tube cancer** located in the abdomen.

<https://www.sciencedirect.com/science/article/pii/S2210261219301373>

Jan 01, 2019 · This case shows that **partial distal resection** of the **gastric tube** can be performed safely without vascular reconstruction of the **right gastroepiploic artery**. Favorable long-term results after **gastric tube reconstruction** support the possibility of **bilateral blood supply** to the gastroepiploic arcade.
