COMMENTS TO AUTHORS

Interesting article, which presents all the possible sonographic findings of the major rheumatic diseases of the ankle. The article is worth publishing. But I wish that the authors would illustrate the data relating to their personal series. This would enable the reader to assess the importance and authority of the authors, and the ultrasound in rheumatology. The references are good and numerous, but only two in 2013, none of the years 2012, 2011, 2010; must be enriched references. The ultrasound images are excellent.
