SPECIFIC COMMENTS TO AUTHORS

Please discuss whether the efficiency of the intravitreal injection of dexamethasone treatment depends on the cause of the scleral inflammation. Please indicate explicitly the “significant side effects for those who are pregnant” Minor comments “has not been extensively studied” instead of “rarely reported before” “who has anxious” anxiety instead of anxious “SUMMAR” SUMMARY instead of SUMMAR “who can’t be suffering the side effect of systemic steroids” Please rephrase the sentence as it does not make sense. “It is one of the most easily misdiagnosed and treatable diseases in ophthalmology” ...and most difficult to treat... instead of “treatable” “choroidal folds” instead of “choroid fold” “this study aimed to evaluate the safety and efficacy” instead of “this study was to evaluated the safety and efficacy” “there was no presence of flare and cells” please rephrase
