

Please discuss whether the efficiency of the intravitreal injection of dexamethasone treatment depends on the cause of the scleral inflammation.

As corticosteroids are the mainstay treatment for non-infectious scleritis, the intravitreal injection of dexamethasone treatment may be a good choice for this autoimmune diseases associated scleritis and idiopathic scleritis, but not for exogenous and endogenous infection associated scleritis.

Please indicate explicitly the "significant side effects for those who are pregnant"

Cyclophosphamide has mutagenic and teratogenic effects, which can cause fetal death or congenital malformation.

Minor comments "has not been extensively studied" instead of "rarely reported before"

revised

"who has anxious" anxiety instead of anxious

revised

"SUMMAR" SUMMARY instead of SUMMAR

revised

"who can't be suffering the side effect of systemic steroids" Please rephrase the sentence as it does not make sense.

revised

"It is one of the most easily misdiagnosed and treatable diseases in ophthalmology" ...and most difficult to treat... instead of "treatable"

revised

"choroidal folds" instead of "choroid fold"

revised

"this study aimed to evaluate the safety and efficacy" instead of "this study was to evaluated the safety and efficacy"
