COMMENTS TO AUTHORS

The manuscript entitled "Chinese herbal formula Gutuojiejiu decoction improves survival rates of patients with severe alcoholic hepatitis: A retrospective cohort study" by Mou HY et al is well written and presented. The authors analyzed the effect of Chinese herbal formula Gutuojiejiu decoction on alcoholic hepatitis patients. Although the effect of formulation is not break through kind of thing but there is some improvement in the clinical profile of the patients. The paper only needs English language improvement. The paper is accepted for publication after English language improvement.
