COMMENTS TO AUTHORS

Dear Authors, I wish to congratulate on your paper on sleeve gastrectomy, that on my opinion deserves publication. As I wrote to the Editor, there are some minor technical details that I think need to be addressed. Moreover, the English language must be revised, since in some cases the text is not clear, for minor grammatical or semantic mistakes. Anyway, simple revision should be enough for publication.

COMMENTS TO AUTHORS

I thank the opportunity to review this article. The article addresses an important entity and many newly qualified surgeons may find this article interesting , but: It includes too many grammatical errors. This study is limited by its retrospective analysis

COMMENTS TO AUTHORS

I thank the opportunity to review this article. Very nicely written article. The article addresses an important entity and many newly qualified surgeons may find this article interesting. The article is thoughtfully written and has a restricted question it tries to answer. The authors have been careful about not imposing their techniques as the standard, because there are many who do this already with slightly different modifications.
