SPECIFIC COMMENTS TO AUTHORS

Despite the relevance of the problem, in modern literature insufficient attention to the feature of management of elderly patients who have a complications of liver cirrhosis. The authors tried to fill this gap. However, I have a number of remarks. I strongly

recommend that the authors to revise the sections of Ascites/edema and Gastrointestinal Bleeding/Varices. They should be written in accordance with the current Clinical Practice Guidelines. In particular, I am very surprised by the recommendations on the use of tolvaptan in the treatment of ascites and injection sclerotherapy in the management of esophageal varices. As well I suggest to describe also other complications mentioned by the authors. I have no doubt that they are important in elderly cirrhotic patients.
