

Supplementary Figure 1 Dose response association between the number of adhered Mediterranean dietary components and (A) advanced colorectal polyps or (B) non-advanced adenomas only among participants undergoing screening/diagnostic colonoscopies (excluding surveillance colonoscopies). OR are adjusted for: age (years), gender, smoking (ever), BMI (kg/m²), use of aspirin, NSAIDs, statin and antidiabetic medication, daily caloric intake (kcal) and colonoscopy indication (screening or diagnostic), and 95%CI are calculated by logistic regression. CRC: Colorectal cancer; BMI: Body mass index; NSAIDs: Non-steroidal anti-inflammatory drugs.
