COMMENTS TO AUTHORS

Kagawa et al in the manuscript entitled "Molecular diagnosis and therapy for occult peritoneal metastasis in gastric cancer patients" present an interesting review. The language needs to be improved but otherwise a clear and well written review.

COMMENTS TO AUTHORS

This review article is on different techniques for detection of gastric cancer cells in the peritotoneum. The article covers newest development in the field. It is wrtten in plain and understandable language. The references are extensive and up to date. The subject matter is relevant and has important clinical implications. I don't have any suggestion and recommendation for change.
