ESPS PEER-REVIEW REPORT

Name of journal: World Journal of Gastroenterology
ESPS manuscript NO: 19018
Title: Differentiation of hepatocellular carcinoma from its various mimickers in liver MRI: What is the tip using hepatocyte-specific agents?
Reviewer's code: 01560464
Reviewer's country: China
Science editor: Yuan Qi
Date sent for review: 2015-05-06 11:11
Date reviewed: 2015-09-10 15:51

COMMENTS TO AUTHORS

1) Gadoxetic acid, as a hepatocyte-specific MR contrast agent with combined perfusion and hepatocyte-selective properties, can improved diagnostic performance in detection and characterization of various focal liver lesions. The review is very important guidence to clinical docotors who can well differentiate HCC from the other various lesions mimicking HCC in liver. 2) I suggest that the article can be published in the form of review in World J Gastroenterology.
