### COMMENTS TO AUTHORS

In this letter to the Editor, ESPS No. 31295, the author takes an issue with the conclusion reached by Siavoshi et al, ref. 20, regarding the role of yeast (*Candida*) in transferring *H. pylori* to human. His divergent opinion is well presented in terms of clarity and intellect, amply justified, and punctuated with real life comparisons, e.g., "David Copperfield tricks". However, the letter requires careful editing and English correcting. Especially, you should correct the grammar, composition, and the choice of used words to convey the intended meaning. The typical jumble is under No. 9, on p.2, "Due to lacking lactobacillus...". Also, on the same page "We have gone wrong way in our hypothesis expression by our manuscript (20)". Moreover, the names of bacteria and fungal species should be written in *Italic*, as per universally adopted convention. Name "Copper field" is one word !

### COMMENTS TO AUTHORS

The letter mentioned some considerable matters, but it is not structurally complete and need the following items: Running title, Abstract, Keywords, Core tip, Supportive foundations and Conflict of interest. Also, the references should be revised according to the guidelines of the journal. Moreover, the title should be limited to 12 words. In addition, the names of the micro-organisms species needs to be rewritten as italic.
