		<input checked="" type="checkbox"/> No	

COMMENTS TO AUTHORS

MAJOR COMMENT: This manuscript offers an interesting overview on an important subject.

MINOR COMMENTS: Ask-upmark kidney -> Ask-Upmark kidney; Weigart-Meyer rule -> Weigert-Meyer rule; Diet's crisis -> Dietl's crisis; please write out abbreviations at first use (DMSA, DTPA); linguistic and stylistic improvement required.

COMMENTS TO AUTHORS

The topic is of interest and relevance and the article is easy to understand. Some acronyms are not declared (DMSA, DTPA). Some more details pronephros regression would be useful. Frequency of supernumary kidneys should be reported. Criteria to distinguish atrophic kidneys from pyelonephritis or chronic vascular diseases should be reported. Some words to explain the difference from multicystic and polycystic kidney would be useful for the reader. The authors should clarify, eventually with a schematic draw how IMA hooks the isthmus determining horse shoe kidney. The authors should explain what is drooping lily sign in IVU.
