## SPECIFIC COMMENTS TO AUTHORS

In my opinion, the analyzed topic is interesting enough to attract the readers' attention. The aim of the study was to report the case of a postmenopausal female with a hemorrhagic Bartholin's cyst who has been using an anticoagulant. In my opinion, the discussion could be studied in depth and extended. In fact, i think that, in order to explore the subject completely, it is necessary to consider also the treatment ad possible complications of this disease. In particular I suggest these two articles to get deeper in the topic: PMID: 28807231 PMID: 34962334. Because of these reasons, the article should be revised and completed. Considered all these points, I think it could be of interest for the readers and, in my opinion, it deserves the priority to be published after minor revisions.

## SPECIFIC COMMENTS TO AUTHORS

This is a case report of Bartholin Glands hemorrhage in a old woman using anti-coagulant. I have some comments: 1. A table summarized the previous cases of Bartholin Glands hemorrhage is recommended. 2. Is imaging examination not need in this case? 3. what about the results of coagulation indicator such as APTT, PT, TT, etc of this patients?
