COMMENTS TO AUTHORS

This report is limited by the low number of patients and the low number of patients that had liver fibrosis >2. Nonetheless, the work is sound, the manuscript clear and concise and the data important to have published. Maybe include some of the pertinent correlations seen in the actual text by referring to the p values themselves.

COMMENTS TO AUTHORS

1. Nice review 2. I believe it would be helpful for the readers of your article if you included therapy for NAFLD and NASH.
