### COMMENTS TO AUTHORS

Manuscript review-ESPS Manuscript NO: 16364 TITLE: Water-immersion colonoscopy and its therapeutic applications AUTHORS: Sugimoto S et al. This is an interesting review concerning water-immersion colonoscopy. It is well and clearly written, and references are exhaustive. I would only suggest the Authors to remove the section entitled "Traditional treatment" (page 9) (it is useless in this review), and to shift some concepts in to the subsequent section (page 10 - "Endoscopic detorsion using water-immersion colonoscopy").

### COMMENTS TO AUTHORS

This review is rich in knowledge. I think it is a good paper. But I have 2 questions:1\ The review included both diagnostic and therapeutic contents. So, the title maybe was not appropriate. 2\ The part of "THERAPEUTIC APPLICATION FOR SIGMOID VOLVULUS" was redundant especially in "Traditional treatment"which should be concise. Please focus on colonoscopic treatment.
