Reviewer #1:

**Scientific Quality:** Grade C (Good)

**Language Quality:** Grade B (Minor language polishing)

**Conclusion:** Accept (General priority)

**Specific Comments to Authors:** This is an interesting study of analysis of key monitoring for bacterial strain distribution and antibiotic sensitivity. In generally, the manuscript is well written. After a minor editing, it can be accepted for publication.

Thank you for your suggestion. I have made some minor modifications and revisions to the feel based on your feedback. Please review

Reviewer #2:

**Scientific Quality:** Grade C (Good)

**Language Quality:** Grade B (Minor language polishing)

**Conclusion:** Minor revision

**Specific Comments to Authors:** This research aimed to record the dispersion of crucial clinical bacteria within a hospital and the continuous monitoring of changes in the drug sensitivity of various multidrug-resistant strains. The study designed is well, methods are clearly described. The manuscript is well written. Comments:

1. The aim in the abstract is not clear, and too long. Please revise it.

Thank you for bringing this to our attention. We have revised the abstract to clarify the aim of the study and have also made it more concise.

2. The limit of the study should be discussed.

We appreciate this insightful comment. A section discussing the limitations of the study has been added to the manuscript.

3. Tables and figures should be moved to end of the study.

Thank you for the suggestion. We have relocated the tables and figures to the end of the manuscript as advised.
