### COMMENTS TO AUTHORS

Kim et al have described a case report of mucinous adenocarcinoma of the duodenum with a pericholedochal lymph node metastasis showing cystic degeneration mistaken for a choledochal cyst. The findings are not novel however, the manuscript is well-written with good images. I would suggest deletion of the comment '...even with the retrospective review by a board-certified abdominal radiologist with 9 years of clinical experience.'

### COMMENTS TO AUTHORS

Authors reported a interesting case of mucinous ADC of the duodenum. The approach in the description is correct. I think that this case report is worth publishing in the WJG.

**COMMENTS TO AUTHORS**

Dear Editor, Kim et al presented a case report titled as „Cystic Metastasis from a Mucinous Adenocarcinoma of Duodenum Mimicking Type II Choledochal Cyst: A Case Report”. The findings are not completely new but are interesting and I believe add some contribution to the literature. The manuscript is well prepared and written however the pictures should be better described. The language is very smooth. It is valuable manuscript especially for young surgeons and oncologists.
