### COMMENTS TO AUTHORS

The current manuscript is based on a review of the literature with an accurate methodology for the review and an interesting and informative overview of the data. The manuscript is well written and it appears as a worthy contribution. The only thing missed is to provide some comments on the possible caveats of every study selected, or at least of any study. It would make te conclusions more valid.

### COMMENTS TO AUTHORS

This is a very nice ms. There is a thoughtful review of the literature and a balanced overview of the conclusions. It might be useful to have a few short line of critique on each of the 11 individual articles as well
