

Prof Ze-Mao Gong,  
Science Editor, Editorial Office  
Baishideng Publishing Group Co., Limited

Belo Horizonte, December 4th, 2017

Dear Prof Ze-Mao Gong,

Please find enclosed the revised version of the invited Editorial entitled: **“Serum levels of Angiotensin Converting Enzyme as a biomarker of liver fibrosis” (manuscript number 36976)** submitted to World Journal of Gastroenterology. This contribution is an invited Editorial for the **Editorial Board Member Prof Ana Cristina Simões e Silva** of World Journal of Gastroenterology, **number ID: 00058405**

**Title: “Serum levels of Angiotensin Converting Enzyme as a biomarker of liver fibrosis”**

**Authors:** Aline Silva Miranda, Ana Cristina Simões e Silva

The Editorial was revised in order to address all suggestions of the reviewer. The Editorial was also checked and revised for the use of English by American Journal Experts (AJE) (please see attached certificate).

Finally, we believe that the revised manuscript has been improved by the revision. We hope that it could be suitable for publication as an Editorial in World Journal of Gastroenterology. All requested files by the Editorial Board were included in the revised submission.

Sincerely yours,

Prof Ana Cristina Simões e Silva, MD, PHD  
Full Professor of Pediatric Department of UGMG, Brazil  
Editorial Board Member of World Journal of Gastroenterology, Number ID: 00058405

Editorial comment entitled ‘Serum levels of Angiotensin Converting Enzyme as a biomarker of liver fibrosis’ is well written manuscript. No seriously grammar mistakes were found and no statistical methods were observed. I think this article can be accepted.

**Answer:** We should thank the reviewer for the kind comments. As recommended by the Editorial Board, American Journal Experts revised the use of English and we included all requested documents.
