Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 16017-Edited.doc).

Title: Resected tumor seeding to stomach wall due to EUS-FNA of pancreatic adenocarcinoma

Author:

Akiko Tomonari¹, MD, Akio Katanuma¹, MD , Tomoaki Matsumori², MD, Hajime Yamazaki¹, MD, Itsuki Sano¹, MD, Ryuuki Minami¹, MD, Manabu Senyo¹, MD, Satoshi Igarashi¹, MD, Toshifumi Kin¹, MD, Kei Yane¹, MD, Kuniyuki Takahashi¹, MD, Toshiya Shinohara³, MD, Hiroyuki Maguchi¹, MD

Name of Journal: *World Journal of Gastroenterology*

ESPS Manuscript NO: 16017

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 Revision has been made according to the suggestions of the reviewer

Reviewer 03026750

1) Comment: Why did you perform gastroscopy at 9 months (was the patient complaining or for follow up)?

Response: The gastroscopy at nine months was performed as a periodical follow-up exam. The patient had no symptoms at that time, as stated in the manuscript. We concur with the reviewer that this is an important point, and the information has been added on page 7.

2) Comment: When you found a submucosal lesion, why did not you perform EUS at closer intervals (6 months)?

Response: The submucosal lesion was found at a follow up gastroscopy which was performed at a private clinic close to the patient's home without a EUS facility, not at our center. The clinician who had performed the exam made the decision to follow up the lesion rather than to consult our center. If the gastroscopy had been performed at our center, EUS would have been performed right away, as the reviewer has suggested. Revisions regarding this point has been made on page 7.
