

Supporting information

Supplementary
Figure S1

Full-length blot of Figure 1D.

Figure S1. The whole PVDF membrane images are presented to analyze the location of the bands of GAPDH.

Supplementary
Figure S2

Full-length blots of Figure 2A.

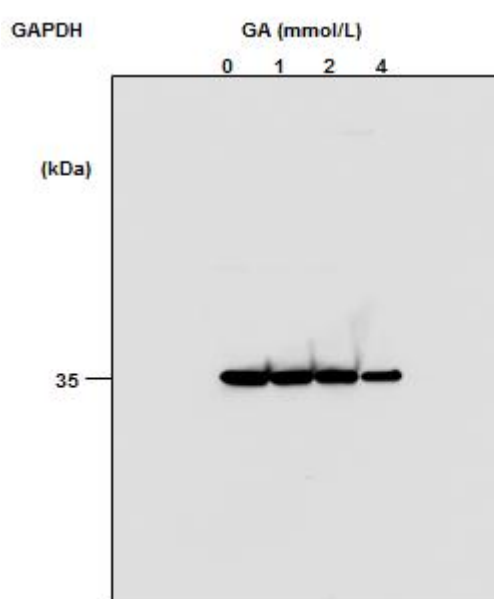

Figure S2. Full-length blots of HSP90α and GAPDH. The whole PVDF membrane images are presented to analyze the location of the bands of GAPDH.

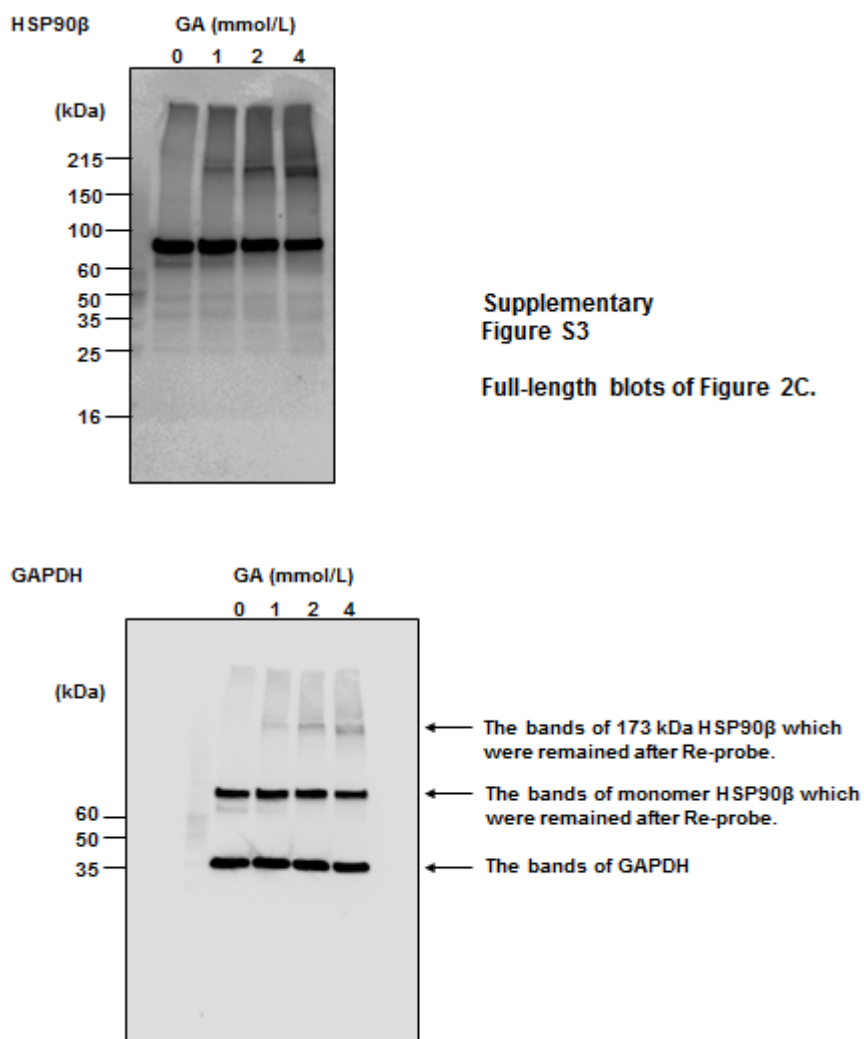

Figure S3. Full-length blots of HSP90 β and GAPDH. The whole PVDF membrane images are presented to analyze the location of the bands of GAPDH.

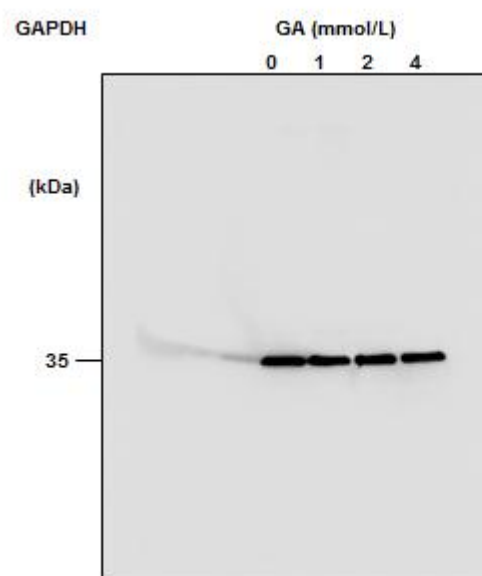

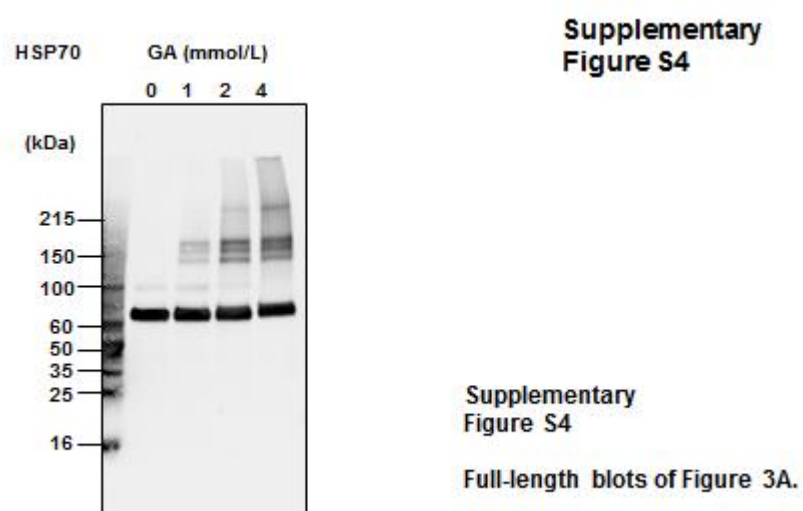

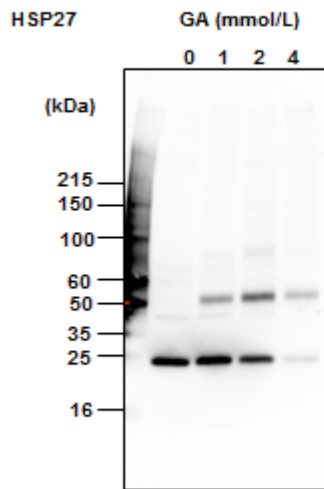

Figure S4. Full-length blots of HSP70 and GAPDH. The whole PVDF membrane images are presented to analyze the location of the bands of GAPDH.

**Supplementary
Figure S5**

**Supplementary
Figure S5**

Full-length blots of Figure 3G.

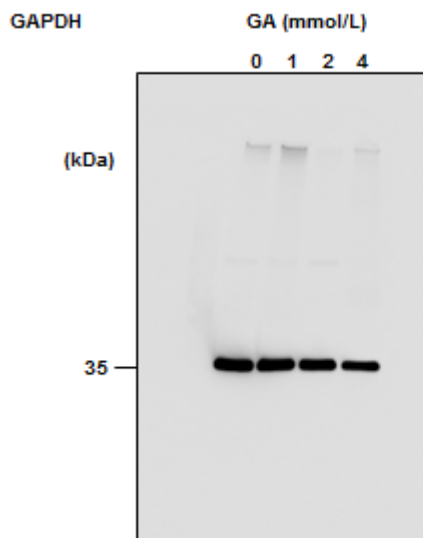

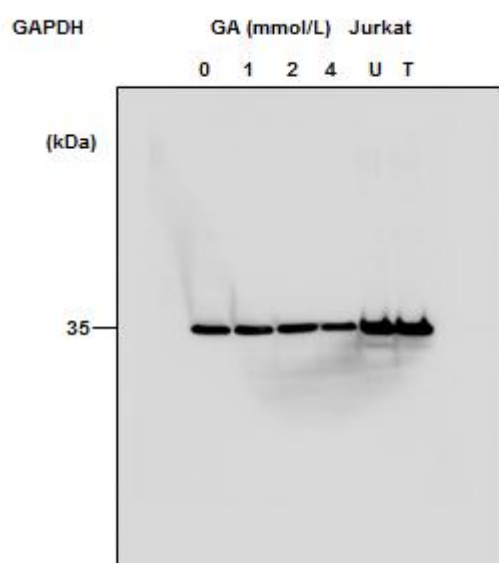

Figure S5. Full-length blots of HSP27 and GAPDH. The whole PVDF membrane images are presented to analyze the location of the bands of GAPDH.

Supplementary
Figure S6

Full-length blot of Figure 4.

Figure S6. Full-length blots of GAPDH. The whole PVDF membrane images are presented to analyze the location of the bands of GAPDH.
