COMMENTS TO AUTHORS

This manuscript is confusing! It is not clear what the purpose is nor is it clear as to what literature the authors have reviewed in order to come up with their results? Is this based in published studies or original data the authors have developed? The abstract should be structured and provide results! Why on report on the prevalence from 4 systematic reviews? Biased! The results have no structure. Figure 2 does not provide any information that cannot be placed in the text. Figure 3 makes no sense, please explain.
