## ESPS PEER-REVIEW REPORT

**Name of journal:** World Journal of Gastroenterology

**ESPS manuscript NO:** 25938

**Title:** Aberrant Post-Translational Protein Modifications In The Pathogenesis Of Alcohol-Induced Liver Injury

**Reviewer's code:** 00199528

**Reviewer's country:** Turkey

**Science editor:** Ya-Juan Ma

**Date sent for review:** 2016-03-26 22:23

**Date reviewed:** 2016-04-03 12:56

		<input checked="" type="checkbox"/> No	

### COMMENTS TO AUTHORS

Comments: ? A summary table showing alcohol induced post-translational modifications in liver should be added to manuscript. ? This sentence must be revised "...., at the era of very efficient direct antiviral drugs, all treatment regimens for HCV infection are based on combination therapy with interferon and ribavirin [61]. " Since direct acting anti-viral agents (DAA) changed the treatment backbone of HCV infection from IFN-ribavirin to DAA.

### COMMENTS TO AUTHORS

It is a comprehensive review for the role of aberrant post-translational protein modifications in the pathogenesis of alcohol-induced liver injury. It reviews all relevant literature, and the paper is written well. I find it useful for WJG readers who are interested with the topic.
