## COMMENTS TO AUTHORS

This is an interesting case report. I only would request the authors minor language polishing, such as "sistyc" instead of cystic.

## COMMENTS TO AUTHORS

Minor revisions: - Abstract doesn't need to be categorized like an original paper. - Needing to give more details about the past med history i.e. the cause of ESRD (HBV infection?), the time on dialysis and the type (hemodialysis?), - The liver function tests doesn't show that much liver failure, does it? Serum albumin and bleeding times (PT, PTT) are not very disturbed. Why Alk-ph was so much high? - Immunohistochemistry analyses, especially HLA analysis for diabetes mellitus is interesting to provide if you have performed them - Give the follow up time and results as long as possible Major revision: I recommend a review of the literature on the triple transplantation of your report's type as case reports and series and providing a table on it.
