COMMENTS TO AUTHORS

1. A section on why this condition is not being reported from all over India would be interesting. 2. Thousands of Gallbladder surgeries are taking place in India daily. It would be interesting to the hands-on experience of surgeons on hepatobiliary ascariasis in India. 3. Viewpoint of Radiologists from other parts of India on the utility of ultrasound in this condition. 4. A flowchart on which patients to undergo which tests in what sequence to establish ascariasis in patients with what complaints would go a long way in helping other readers.
