Tipping the balance - Haemoglobinopathies and the risk of diabetes

Henry J Baldwin, Aislinn E Green, Kayleigh M Spellar, Philip J Arthur, Hannah Philips, Jeetesh V Patel

Abstract

AIM: To establish a link between the risk of diabetes with haemoglobinopathies by examining available evidence of the effects of iron and blood glucose homeostasis from molecular to epidemiological perspectives.

5 **METHODS:** A systematic literature search was performed using electronic literature databases using various search terms. The International Diabetes Federation (IDF) World Atlas was used to generate a list of populations with high rates of diabetes. PubMed,
