**Enteroscopy** in children and adults with inflammatory bowel disease

Giovanni Di Nardo, Gianluca Esposito, Chiara Ziparo, Federica Micheli, Luigi Masoni, Maria Pia Villa, Pasquale Parisi, Maria Beatrice Manca, Flavia Baccini, Vito Domenico Corleto

### Abstract

Inflammatory bowel disease (IBD) includes Crohn's disease (CD), ulcerative colitis and unclassified entities. CD commonly involves the terminal ileum and colon but at the time of diagnosis it can be confined to the small bowel (SB) in about 30% of the patients,

Enteroscopy in children

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6137589>

Jul 12, 2018 - Obscure gastrointestinal bleeding, **Crohn's disease** and **small bowel polyps** are the main indications of enteroscopy in children. Device-assisted enteroscopy has high diagnostic yield for the main paediatric indications, but MR-enterography and capsule endoscopy should be used beforehand in diagnostic work-up to better identify candidates for enteroscopy and to improve its diagnostic and ...

Enteroscopy in paediatric Crohn's disease - ScienceDirect

<https://www.sciencedirect.com/science/article/pii/S1590865812002897>

May 01, 2013 - 1. Introduction. **Crohn's disease** is a chronic immuno-mediated inflammation belonging to the **inflammatory bowel diseases** and also including ulcerative colitis and unclassified entities .The overall incidence **in children** in Western countries is approximately 5–6/100.000/year .The **disease** involves the **small bowel** in approximately 70% of cases and can be confined to the **small bowel** in up ...

Inflammatory Bowel Disease

Medical Condition

A group of intestinal disorders that cause inflammation of the digestive tract.

- 🏠 Common (More than 200,000 cases per year in US)
- 🧪 Often requires lab test or imaging
- 🔧 Treatments can help manage condition, no known cure
- 🕒 Can be lifelong

IBD is said to be the result of autoimmune reactions. Inflammatory bowel disease (IBD) presents as Crohn's disease or ulcerative colitis. It may be characterized by diarrhea, abdominal pain and cramping, tiredness, and weight loss. Anti-inflammatory drugs play an important role in the treatment. Surgery is sometimes performed.

Symptoms

Symptoms may vary from mild to severe and include:

- Diarrhea
- Fever
- Fatigue
- Blood in stool
- Bleeding ulcers
- Stomach pain
- Bloating and cramping
