**Under-diagnosing and under-treating iron-deficiency in hospitalized patients with gastrointestinal bleeding**

**Mustapha M El-Halabi, Michael S Green, Christopher Jones, William J Salyers Jr**

**Abstract**

**AIM:** To determine whether patients hospitalized with gastrointestinal (GI) blood loss anemia are being checked and treated for iron deficiency.

**METHODS:** Retrospective chart review was conducted for all patients admitted to a single tertiary care hospital between 11/1/2011 and 1/31/2012 for any type of gastrointestinal bleeding. The primary endpoint was the percentage of patients who had their iron studies checked during a hospitalization for GI blood loss anemia. Secondary outcomes included percentage of anemic GI bleeders who had adequate documentation of anemia and iron deficiency, and those who were treated for their iron deficiency. Then we tried to identify possible
